## ABOUT

Ahmed Hesham is not your ordinary digital media artist. He is a determined professional in motion graphics, animation, cinematography as well as photography. Ahmed is known for being highly passionate in all aspects of his work and constantly learning. When he is not on his laptop being creative, he enjoys heading to the auto drome for some racing. Ahmed divides his works into a theme which is "الحقيقة / Illusion" meaning reality vs illusion which is the idea of making his work represent both the emotional side of what truly happens. He is seeking an opportunity to be part of a challenging company where he could increase production and growth of all creative concepts.
